E:\StorageProtection.txt - Notepad++
StorageProtection.txt
Protect medical data with Storage Protection!
Existing network protection or endpoint protection alone cannot fundamentally block ransomware or
administrator privilege attacks. We need a way to protect medical data even if ransomware is executed
on a PC or server or administrator privileges are compromised.
Storage Protection Software for Medical Institutions
Verified by international standards, Common Criteria (CC), and GS certifications,
storage protection software is provided free of charge.
On-site and Online Training for Medical Institutions
Training is provided so that hospital IT staff can install and use the storage protection software effectively.
Additional Support from Local Members
For small hospitals without IT staff, nearby support members (PC repair shops, MSPs, software vendors,
hardware manufacturers, ISPs, etc.) provide assistance in applying and using the storage protection software.

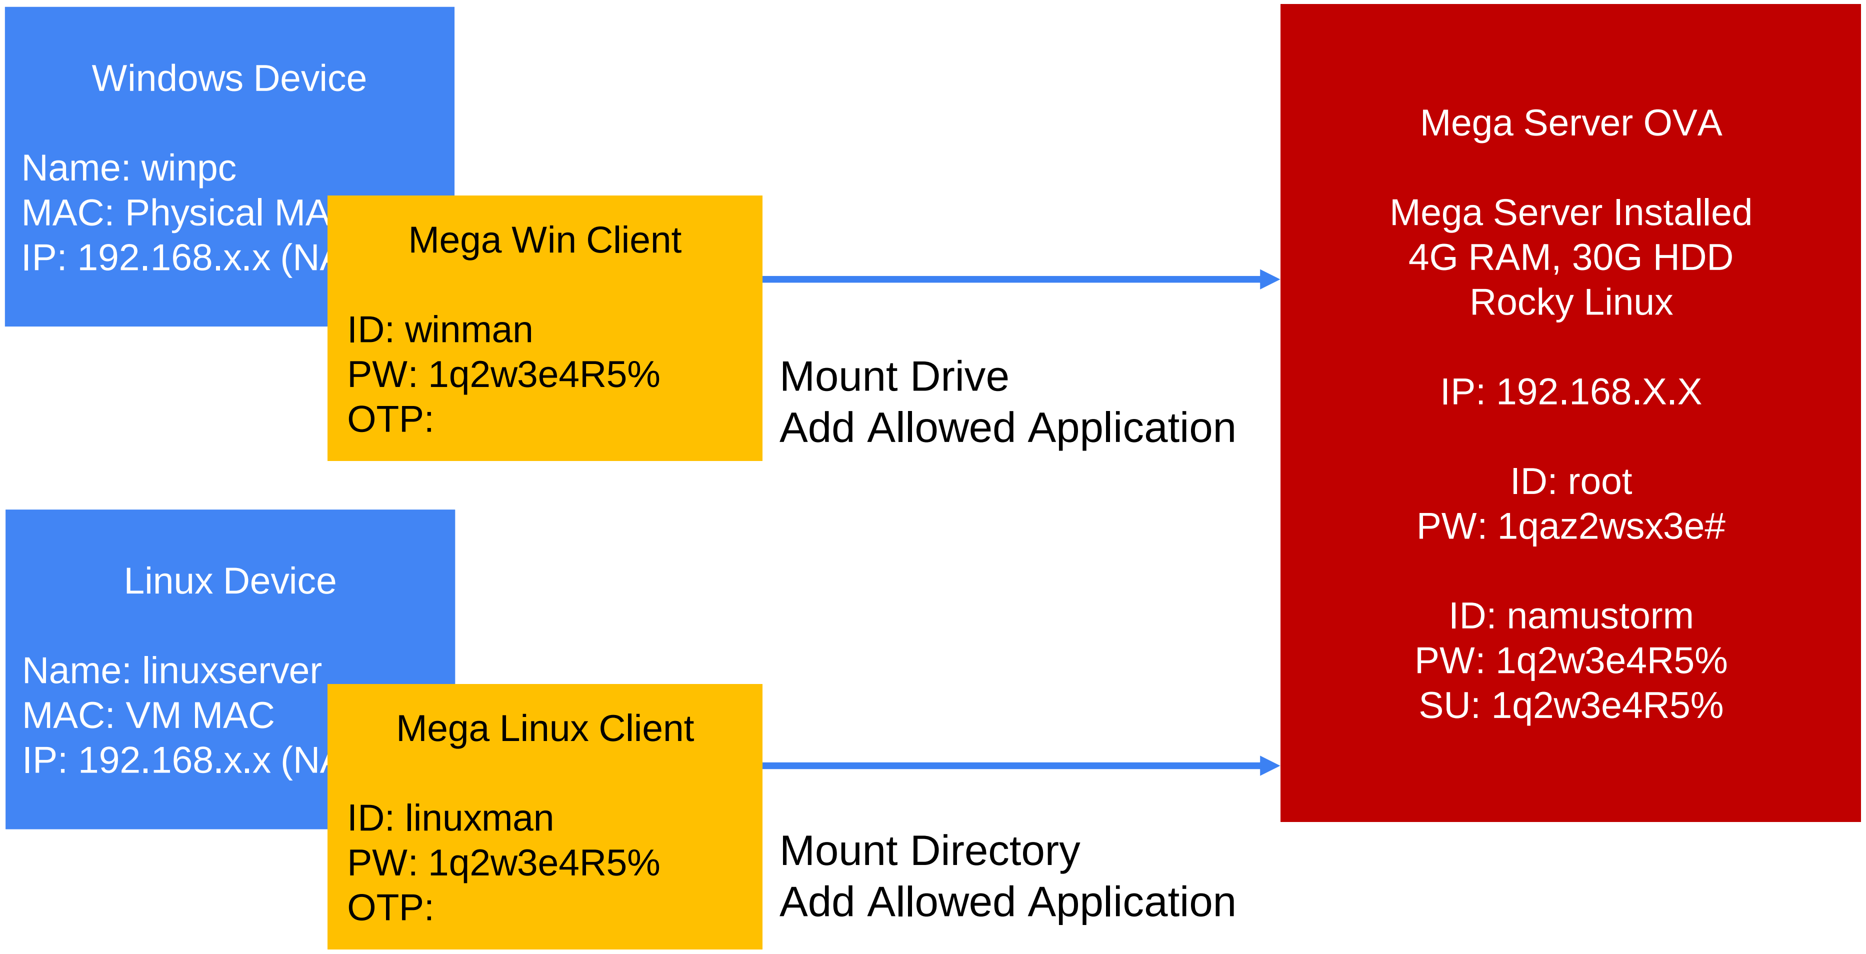
1. Create and Mount Volume
2. Managing Allowed Applications

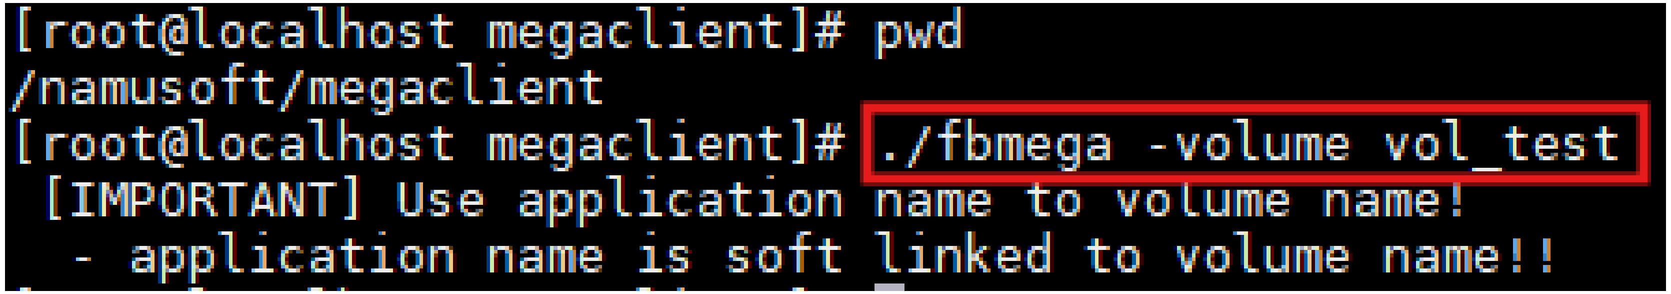
Device and Device Admin



In FilingBox MEGA,
a Volume is a logical management unit that maps a specific directory with its associated application access policies.

Create new Volume

./fbmega -volume vol_test



Volume Mount

Mounting is the process of linking a physical directory path on a device to a created Volume (logical unit).

mkdir /mnt/test_mega

./vol_test –mount /mnt/test_mega/ -addr 192.168.x.x –port 30083 –id linuxman

5.1 Create and Mount Volume

Volume Mount

- Enter the 6-digit code after OTP registration
- Enter New Password & Confirm it.

*OTP registration is required only during the initial login.

1. Create New temporary file

```
[root@localhost megaclient]# vi /tmp/source_file.txt
[root@localhost megaclient]# cat /tmp/source_file.txt
MEGA is
application level storage protection software
[root@localhost megaclient]# ls -l /tmp/source_file.txt
-rw-r--r--. 1 root root 55 12월  1 11:17 /tmp/source_file.txt
```

Create or modify the tmp file

vi /tmp/source_file.txt

Display the tmp file

cat /tmp/source_file.txt

2. Use of cp not registered as an allowed application

cp /tmp/source_file.txt /mnt/test_mega/

```
[root@localhost megaclient]# cp /tmp/source_file.txt /mnt/test_mega/
cp: cannot create regular file '/mnt/test_mega/source_file.txt': Permission denied
```

3. Register cp command as an allowed application (read-write, rw permission).

./vol_test –alwapp –add –p /usr/bin/cp –d / -o rw

```
[root@localhost megaclient]# pwd
/namusoft/megaclient
[root@localhost megaclient]# ./vol_test -alwapp -add -p /usr/bin/cp -d / -o rw
  password :
  totp :
add app success
 IP              Mode    Appication      Folder
192.168.200.215 rw      /usr/bin/cp     /vol_test
```

4. Check whether the allowed application cp is applied

cp /tmp/source_file.txt /mnt/test_mega/

ls –l /mnt/test_mega/

```
[root@localhost megaclient]# cp /tmp/source_file.txt /mnt/test_mega/
[root@localhost megaclient]# ls -l /mnt/test_mega/
합 계 0
-rw-r--r--. 1 root root 54 11월  25 17:31 source_file.txt
```

5. Use of cat not registered as an allowed application

cat /mnt/test_mega/source_file.txt

```
[root@localhost megaclient]# cat /mnt/test_mega/source_file.txt
Can't read or write content of the file unless you set [root@localhost megaclient]#
```

6. Register cat as an allowed application (read-only, ro permission).

./vol_test –alwapp –add –p /usr/bin/cat –d / -o ro

```
[root@localhost megaclient]# pwd
/namusoft/megaclient
[root@localhost megaclient]# ./vol_test -alwapp -add -p /usr/bin/cat -d / -o ro
  password :
  totp :
add app success
 IP              Mode    Appication       Folder
192.168.200.215 rw      /usr/bin/cp      /vol_test
192.168.200.215 ro      /usr/bin/cat     /vol_test
```

7. Check whether the allowed application cat is applied

cat /mnt/test_mega/source_file.txt

```
[root@localhost megaclient]# cat /mnt/test_mega/source_file.txt
MEGA is
application level storage protection software
```

FILINGCLOUD

8. Use of rm not registered as an allowed application

ls –l /mnt/test_mega/source-file.txt

```
[root@localhost megaclient]# ls -l /mnt/test_mega/source_file.txt
-rw-r--r--. 1 root root 54 11월  26 10:17 /mnt/test_mega/source_file.txt
[root@localhost megaclient]# rm /mnt/test_mega/source_file.txt
rm: remove 일반 파일 '/mnt/test_mega/source_file.txt'? y
rm: cannot remove '/mnt/test_mega/source_file.txt': Permission denied
```

9. Register rm as an allowed application (read-write, rw permission).

./vol_test –alwapp –add –p /usr/bin/rm –d / -o rw

```
[root@localhost megaclient]# pwd
/namusoft/megaclient
[root@localhost megaclient]# ./vol_test -alwapp -add -p /usr/bin/rm -d / -o rw
  password :
  totp :
add app success
 IP             Mode    Appication      Folder
192.168.200.215 rw      /usr/bin/cp     /vol_test
192.168.200.215 ro      /usr/bin/cat    /vol_test
192.168.200.215 rw      /usr/bin/rm     /vol_test
```

10. Check whether the allowed application rm is applied

rm /mnt/test_mega/source_file.txt

```
[root@localhost megaclient]# rm /mnt/test_mega/source_file.txt
rm: remove 일반 파일 '/mnt/test_mega/source_file.txt'? y
[root@localhost megaclient]# ls -l /mnt/test_mega/source_file.txt
ls: cannot access '/mnt/test_mega/source_file.txt': No such file or directory
```

/dev/mapper/rl-root    37G  3.8G   34G  11% /
[root@localhost ~]# systemctl restart mega.service
```

Execute the following script:

 # 1. Check the current disk layout
su -
lsblk -o NAME,TYPE,SIZE,FSTYPE,MOUNTPOINT

 # 2. Extend the partition to use the free space
 # (Ex: when partition 2 is an LVM2_member)
parted /dev/nvme0n1 resizepart 2 100%
partprobe

 # 3. Resize the LVM PV*
pvresize /dev/nvme0n1p2

 # 4. Extend the root LV and filesystem**
lvextend -r -l +100%FREE /dev/mapper/rl-root

 # 5. Verify the result
df -h /

 # 6. Restart the MEGA service
systemctl restart mega.service

PV* : Physical Volume
LV** : Logical Volume

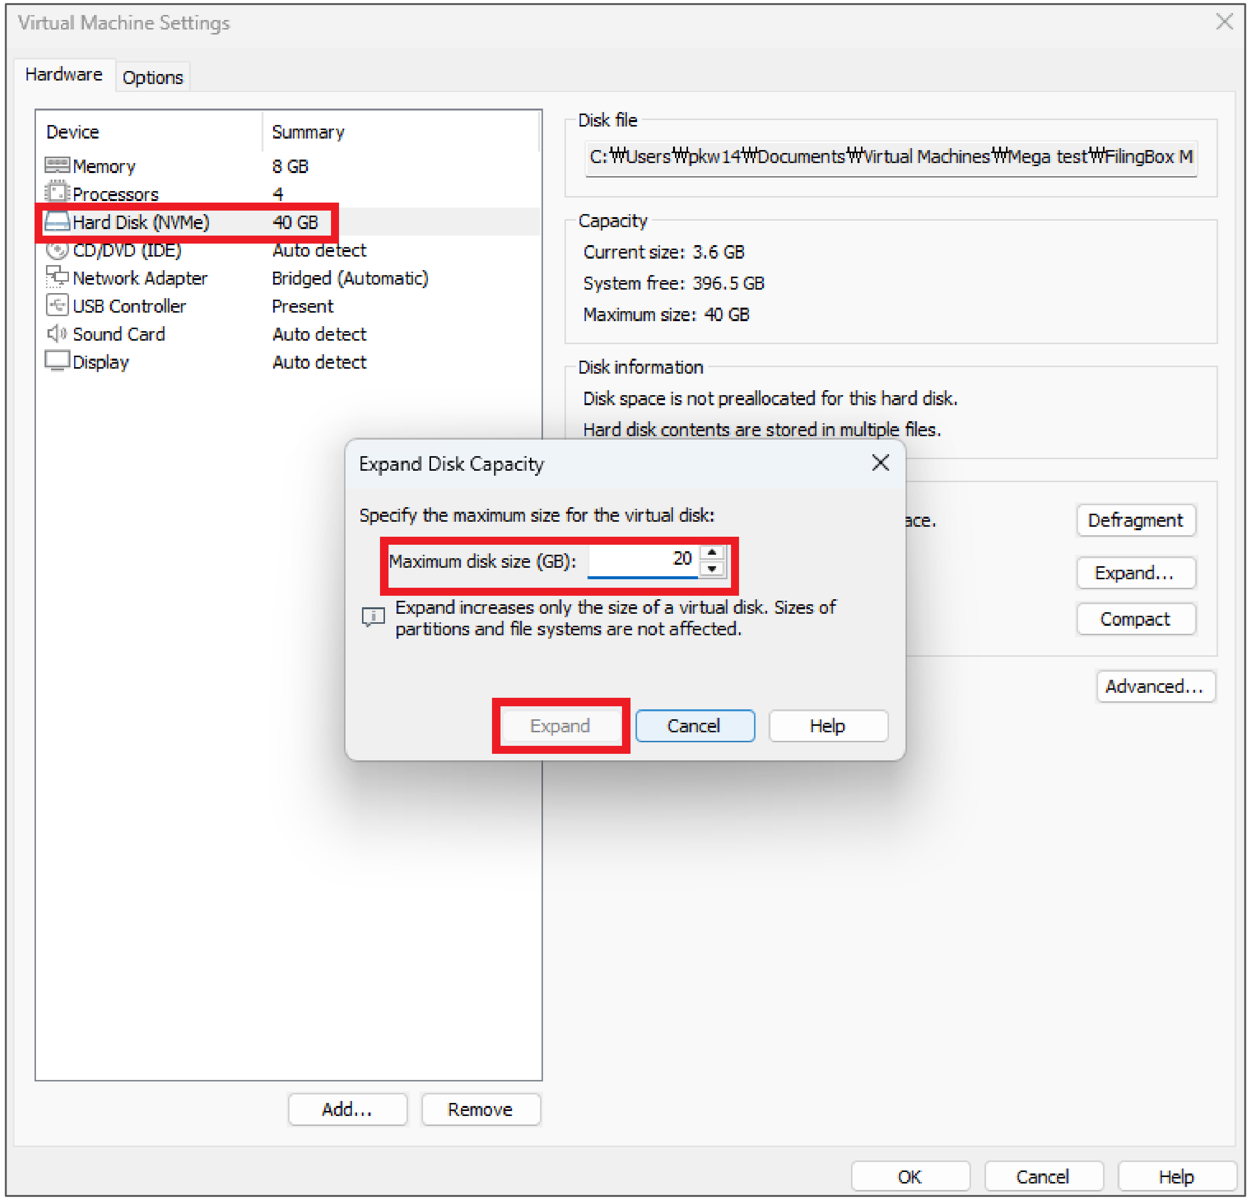
FAQ1) Changing the Mega Allocated Capacity of the Virtual Machine



***Caution**

VMware does **not provide** a method to **reduce disk** capacity.

If a capacity smaller than the current size.
(e.g., 20 GB when the current capacity is 40 GB) is specified, the button will be disabled, as shown on the screen.

Thank you
